

# NEWSLETTER

The upcoming SUSE competition is an exciting opportunity for young entrepreneurs to showcase their innovative social and sustainable business ideas. After completing the training modules, participants will pitch their projects to a panel of experts, mentors, and community stakeholders.

This competition will take place in each participating country, with local events designed to highlight regional challenges and solutions. It's not just about winning; it's about creating real-world impact and building connections that can help bring ideas to life. Participants will have the chance to gain valuable feedback, secure mentorship, and network with potential funders and collaborators.

The competition aims to inspire youth, provide a platform for creativity, and drive change in local communities, encouraging young people to pursue their entrepreneurial dreams and contribute to building more sustainable and socially inclusive futures.

## WHAT'S NEXT?

In the upcoming week partners will organise their competitions and start to select the ideas who will pitch at their events. If you are interested in taking part or want to have a look at the final modules go to: [https://suse-theproject.eu/about-us/!](https://suse-theproject.eu/about-us/)

## SUSTAINABLE & SOCIAL ENTREPRENEURSHIP FOR YOUTH

Jan 2025

Issue #3

**“The SUSE project is a good introduction to social entrepreneurship .”**

### **Thank you for helping us pilot SUSE!**

The SUSE piloting phase is reaching its grand conclusion, marking a significant milestone in the project’s journey to empower youth and youth workers. Over the past months, participants across Europe have engaged in hands-on training, exploring innovative approaches to social and sustainable entrepreneurship.

As the piloting wraps up, SUSE stands poised to expand its reach, bringing its vision of inclusive, sustainable communities closer to reality—thanks to the dedication of every participant and partner involved.

In the upcoming weeks, we will be finalizing the Digital Coaching Manual for Youth Workers of the SUSE project. This manual will be a key resource, offering youth workers practical guidance on using digital tools and innovative methodologies to effectively support young people in their journey toward social and sustainable entrepreneurship.

As we finalize the manual, it will undergo a testing phase. Youth workers will put the content into practice, providing valuable feedback on its usability, effectiveness, and relevance. This testing will help us fine-tune the manual, ensuring it meets the needs of both youth workers and young participants. By the end of this process, we aim to have a robust, user-friendly manual ready for wider use, empowering youth workers to enhance their coaching and mentorship, ultimately benefiting the next generation of social entrepreneurs.
